Subject: Microsoft setlement

Please leave Microsoft alone to do its business. The U.S.A. and the whole world need a leader in software business. We sure don't want to have to learn 100 different ways to use our computer just because U.S. J.D wants to have 100 strong companies.

Without Microsoft and Intel companies, the U.S. which has been way behind the Japanese in the 80's, would never have a chance to go back to be the world leader again since the 90's. I don't understand why we want to weaken our own strength to give the Europeans and the Japaneses a new chance to get ahead (example Boeing vs Airbus in airplane business, and the Toyota vs Ford in car business).

My opinion is if the U.S. goverment will not support Microsoft (or any of the industry leader), it should not constrain it either. The United States of America is strong and will be a strong country because its citizens and corporates are allowed to have the freedom to think and to act.

GOD BLESS AMERICA FOREVER.
